

 [kosac-achyut](#) / [gcr_automation](#)[Code](#)[Issues](#)[Pull requests](#)[Actions](#)[Projects](#)[Wiki](#)[Security](#)[Insights](#)[Set](#)

Quick setup — if you've done this kind of thing before

Set up in Desktop

or

HTTPS

SSH

https://github.com/kosac-achyut/gcr_automation

Get started by [creating a new file](#) or [uploading an existing file](#). We recommend every repository include a [README](#), [LICENSE](#), and [.gitignore](#).

..or create a new repository on the command line

```
echo "# gcr_automation" >> README.md
git init
git add README.md
git commit -m "first commit"
git remote add origin https://github.com/kosac-achyut/gcr_automation
git push -u origin master
```

..or push an existing repository from the command line

```
git remote add origin https://github.com/kosac-achyut/gcr_automation
git push -u origin master
```

..or import code from another repository

You can initialize this repository with code from a Subversion, Mercurial, or TFS project.

[Import code](#)

 **ProTip!** Use the URL for this page when adding GitHub as a remote.
